PHINS — Actuary Meeting Record (24 September 2026) · Mr. Ori Freilichman, F.IL.A.A.

Internal · Confidential. Thursday 24 September 2026, 22:00, with Mr. Ori Freilichman, F.IL.A.A. The meeting was attended. He announced that he will join the PHINS team when the regulatory proof-of-concept and the fundraising take place, and he offered to assist with research before the Authority pre-ruling meeting of 12 October 2026. This is a record of what was said. It is not an employment contract, a board appointment, or an actuarial opinion.

Meeting facts

Item	Detail
Date	Thursday 24 September 2026
Time	22:00 (Israel)
Format	Meeting · attended
Counterparty	Mr. Ori Freilichman, F.IL.A.A.
Designation	Fellow of the Israel Association of Actuaries. He signs the fellowship F.IL.A.A. The association also writes F.I.L.A.A. for the same full-member status.
Public profile	Consulting actuary; life and health pricing and reserving. A public profile lists Milliman in Tel Aviv. This meeting does not engage that firm and does not record a resignation.
Subject	Joining the PHINS team at the regulatory proof-of-concept and at the fundraising
Status	Held
Continues	Actuary Briefing (`#actuary-briefing-section`). He is not the unnamed executive actuary of 26 May 2026.
Research offer	Before the Authority pre-ruling of 12 October 2026 (`#regulatory-preruling-avi-ovadia`)
Same evening, other room	Grove VC Zoom with Mr. Lotan Levkovitch (`#grove-vc-meeting-24sep`). That call is an investor follow-up. This room is actuarial. The two are not one meeting.
One standard	Unified Business Plan · Investor Deck · Appendices (`#unified-business-plan-card`)
Pack	Pitch dashboard — Actuary Briefing and the Freilichman 24.9 section

Purpose. Record the attended meeting, the condition on which he said he will join, and the research offer. Leave title, equity, salary, a board seat, and a start date unset, because none was set in the room.

What he announced

- He will join the PHINS team when two events take place: the regulatory proof-of-concept, and the fundraising.

- On this book the regulatory track is the Authority pre-ruling set for 12 October 2026 in Jerusalem with Mr. Avi Ovadia. As of 24 September that meeting was still ahead. Later bars record that the track opened. They do not record an Authority outcome, and this record does not add one.
- The fundraising identity is the canonical seed already on the plan: ILS 6,000,000 on ILS 24,000,000 pre-money (ILS 30,000,000 post, 20%). He did not subscribe. The meeting did not reprice the round.
- "On board" is recorded as joining the team when those events take place. It is not recorded as an appointment to the board of directors. No resolution, observer right, or voting seat was discussed.

What he offered

Research assistance before the 12 October regulatory meeting. The offer is the whole of what was recorded. A memorandum, a signed opinion, and a list of assumptions he reviewed are not in this record. The 12 October pack is unchanged by this meeting.

The research, when it is done, reads the same Israel anchor as every other bar: annual risk premium ILS 4,518 at the age-42 kernel specimen; PHINS take 25% and carrier share 75%; end-of-year in-force 24,000 / 94,080 / 230,554. Sales remain modelled from Gate 5 on 1 January 2027. PHINS Technologies Ltd. is not a licensed insurer.

What this meeting is not

- It is not the 26 May 2026 executive-actuary meeting. That room was an unnamed actuary recognised in Israel, Canada, and the United States, who confirmed the pricing model and introduced Mr. Meir Uzan. Mr. Freilichman was not in that record.
- It is not the Grove VC Zoom on the same date. Grove is a 30-minute investor follow-up with Mr. Lotan Levkovitch. Time there is still TBC. This meeting is 22:00.
- It is not a Milliman engagement. His public employer is context for a conflict check that has not been done. The firm is not a party.
- It is not a hired Chief Actuary, a co-founder grant, or a PHINS-for-Actuaries contract. Those options remain the 26 May menu. None of them was selected on 24 September.

PHINS strength for this point of view

An actuary who may join later can test the book without a second model.

- **One kernel.** The age-42 specimen is ILS 4,518. Average in-force 12,000 / 59,040 / 162,317 times that premium is risk GWP ILS 54,216,000 / 266,742,720 / 733,348,206. Twenty-five percent is PHINS net revenue ILS 13,554,000 / 66,685,680 / 183,337,052.
- **The carrier holds the risk.** The other 75% is ILS 40,662,000 / 200,057,040 / 550,011,154. It is not PHINS revenue.
- **The record is the control.** AI recommends. The ledger decides. A customer's national ID has one writer. Research he does should read those facts, not replace them.
- **The round is already allocated.** Technology ILS 2,400,000, regulatory / actuarial / reinsurance ILS 1,200,000, distribution ILS 1,500,000, operations and reserve ILS 900,000. Those four lines sum to ILS 6,000,000. His joining is not a fifth line.

Open items after the meeting

Item	State
Joining	Announced, conditional on the regulatory proof-of-concept and the fundraising. Not started.
Title, equity, salary, board seat, start date	Not set

Item	State
Research before 12 October	Offered. Not recorded as delivered.
Conflict with a current employer	Not checked. His public profile lists Milliman.
Authority outcome of 12 October	Not in this record
Subscription to the seed	Not in this record

Data integrity

Every figure in this brief is a canonical default of plan identity `unified-2026.10-v1`. Israel anchor, 2027 / 2028 / 2029: annual risk premium ILS 4,518; PHINS take 25% and carrier share 75%; new issues 25,000 / 75,000 / 150,000; end-of-year in-force 24,000 / 94,080 / 230,554; average in-force 12,000 / 59,040 / 162,317; risk GWP ILS 54,216,000 / 266,742,720 / 733,348,206; PHINS net revenue ILS 13,554,000 / 66,685,680 / 183,337,052; insurance take ILS 40,662,000 / 200,057,040 / 550,011,154. Checks: 12,000 × 4,518 = 54,216,000; 59,040 × 4,518 = 266,742,720; 162,317 × 4,518 = 733,348,206; 25% of those GWP lines are the PHINS net lines above. Seed ILS 6,000,000; pre-money ILS 24,000,000; post-money ILS 30,000,000; dilution 20%. Use of seed: product and technology ILS 2,400,000 (40%); regulatory, actuarial and reinsurance ILS 1,200,000 (20%); distribution and local partnerships ILS 1,500,000 (25%); operations and reserve ILS 900,000 (15%); sum ILS 6,000,000. Group 2027 EBITDA ILS -18,846,000 (published label -ILS 18.8M). Peak cumulative group need ILS 20,184,120 (published label ILS 20.2M). Series A indication ILS 18,000,000. Israel-anchor appraisal ILS 264,575,328 (published label ILS 264.6M). A live factor edit on the plan page is a scenario and does not rewrite this brief. This meeting does not write the platform ledger, the actuarial store, or the 12 October file.
