PHINS — Regulatory Meeting Brief (27 July 2026) · Herzog Fox Neeman & Co. Advocates

Internal · Confidential — preparation brief for the 30-minute regulatory introduction meeting. Do not share internal drafts before the meeting.

Meeting facts

Item	Detail
Date	27 July 2026
Duration	30 minutes (hard timebox)
Counterparty	Herzog Fox Neeman & Co. Advocates
Regulatory manager	Mrs. Neta Dorfman Raviv
Location	TBC
Status	Scheduled
Pack	Pitch dashboard — Regulatory Meeting 27.7 section

Purpose: introduction to the PHINS platform and **product regulatory posture**, **IP protection**, **B2B contracts**, and the **global view** — anchored to the PHINS business plan and the published Israel regulatory application memorandum (`/investor-docs/israel-regulatory-application-he.pdf`, Hebrew canonical; English companion available). The run of show below is timeboxed so the 30 minutes stay energetic and productive and end with a defined engagement scope.

Elevator pitch — 30 seconds

PHINS is a **built, production insurance platform** entering its regulated go-to-market phase in Israel. We need a regulatory partner for four workstreams — **product regulatory, IP protection, B2B contracts, and the global rollout** — all documented in the business plan and the regulatory application memorandum already published on the platform.

30-minute run of show — hard timeboxes

Minutes	Segment	Talking points & source
00–03	Opening — PHINS in 90 seconds	AI-operated insurance operating system, **159 deployed modules** (live count from the `services/` layer) on an append-only hash-chained ledger — **AI recommends, the ledger decides**. Disability / LTC severity product; Israel first.
03–09	Platform & product regulatory	Capital Market, Insurance & Savings Authority pathway; digital MGA / platform posture (claims reserves stay on the carrier); walk the **Israel regulatory application memorandum (Hebrew)** — ask where counsel sees gaps or accelerators.
09–15	IP protection	Codebase, AI/actuarial models, integrity-contract architecture, and brand: what to file vs. hold as trade secret; founder / contractor IP assignments; protection strategy ahead of B2B licensing and multi-market rollout.
15–21	B2B contracts	Contract stack from the business plan: insurer JV / MGA agreements, technology license + royalty, reinsurance-adjacent terms, supplier and agent agreements, NDAs and term sheets already in use on the platform.
21–27	Global view	Multi-jurisdiction roadmap per the business plan: IL as proof market, then OECD markets on the same codebase via the regulatory adapter layer — where the firm's regulatory and international desks plug in.
27–30	Wrap-up & next steps	Agree engagement scope and workstreams (regulatory / IP / contracts / global), owners on both sides, and the follow-up meeting date. Log the outcome in the Meeting Diary.

Run-of-show rules: hard timeboxes with a visible timer, one speaker per segment, materials pre-shared, demo pre-loaded, decisions captured live in the diary — questions parked to the wrap-up unless blocking.

Pre-meeting preparation (send / load before the meeting)

- **Israel regulatory application (Hebrew)** — `/investor-docs/israel-regulatory-application-he.pdf` (English version available for the international desk).
- **PHINS business plan** — canonical IL model and multi-market roadmap (source for the global-view segment).
- **Contract inventory** — NDA, term sheet, JV / MGA structures, and license-and-royalty terms already used across the partner tracks.
- Platform demo pre-loaded (pitch dashboard + admin portal) — shown only if

time allows; the timeline never slips for it.

Decision outputs — leave the meeting with

1 Counsel's read on the **regulatory pathway** and the application memorandum (gaps, accelerators, sequencing).

1 A proposed **engagement scope** across the four workstreams, with owners on both sides.

1 Priority order: what must be in place **before** the next partner / investor signings.

1 A scheduled follow-up — logged in the Meeting Diary on the pitch dashboard.

Sources

- PHINS business plan (canonical IL model and multi-market roadmap).
- Israel regulatory application memorandum — `/investor-docs/israel-regulatory-application-he.pdf` (Hebrew canonical) and `/investor-docs/israel-regulatory-application-en.pdf` (English companion).

Data integrity notice: this brief is an operational admin preparation tool. The regulatory content derives from the published Israel regulatory application memorandum and the PHINS business plan; nothing here restates financials beyond the canonical IL model used across the pitch dashboard. The agenda, prep list, and decision outputs are internal planning aids — not legal advice and not commitments — and this document does not write to the platform ledger.
