PHINS × Swiss Re Israel — Meeting Deck and Film Script (8 December 2026) · Mr. Hillel Damelin, Regional CEO Israel

Internal · Confidential. The presentation for the meeting with Mr. Hillel Damelin, Regional CEO, Israel — Swiss Re, on Tuesday 8 December 2026: the Israel pilot from 1 January 2027 and the five-year plan to 2031, read from the reinsurer's seat. Every figure is a default of plan identity `unified-2026.10-v1` (canonical; content hash `9128223e1c222388…`) and regenerates from the same model as the unified business plan. Nothing is bound by this deck; no limit, ticket or price is set. The plan is not written by this meeting.

Meeting facts

Item	Detail
Date	Tuesday 8 December 2026
Counterpart	Mr. Hillel Damelin — Regional CEO, Israel — Swiss Re
PHINS	Asaf Ashury, Adv. — Founder & CEO, PHINS Technologies
Subject	Israel pilot and the five-year plan — quota share, options, next steps
Format	12 slides · one 15-second scene per paragraph · short film plays the filmed scenes in order
Pack	`/reinsurer-deck.html` (presentation + script sheet) · pitch dashboard — Swiss Re Israel 8.12 section · Group CEO assessment (7 Nov) · unified business plan Appendix B
Status	Scheduled

The ceded line the reinsurer sees — Israel anchor book, default factors

Quota share 18% · expected claims 62% · ceding commission 25%. Technical result = ceded premium – ceded claims – ceding commission = 13% of ceded premium; break-even claims ratio 75%.

Year	Risk GWP	Ceded premium	Ceded claims	Ceding commission	Technical result	Result (USD, planning FX)
2027	₪54.2M	₪9.8M	₪6.1M	₪2.4M	₪1.3M	$0.3M
2028	₪266.7M	₪48.0M	₪29.8M	₪12.0M	₪6.2M	$1.7M
2029	₪733.3M	₪132.0M	₪81.8M	₪33.0M	₪17.2M	$4.7M
2030	₪1.33B	₪238.5M	₪147.9M	₪59.6M	₪31.0M	$8.4M
2031	₪1.87B	₪336.6M	₪208.7M	₪84.1M	₪43.8M	$11.9M
Five years	₪4.25B	₪764.9M	₪474.2M	₪191.2M	₪99.4M	$27.0M

Quota-share options for the pilot — scenarios of the same model

The plan's cession is the reference. Each alternative is `compute_plan` with the current inputs and a different `cession_rate`; it carries its own content hash and is labelled a scenario. PHINS revenue and EBITDA do not

move with the cession; the carrier's result does.

Cession	Ceded premium 2027	Technical result 2027	Ceded premium 5y	Technical result 5y	Carrier margin	PHINS revenue 5y	Plan identity
18% (plan)	₪9.8M	₪1.3M	₪764.9M	₪99.4M	5.7%	₪1.48B	`9128223e1c22` · canonical
30%	₪16.3M	₪2.1M	₪1.27B	₪165.7M	4.1%	₪1.48B	`e8ce587db069` · scenario
50%	₪27.1M	₪3.5M	₪2.12B	₪276.2M	1.5%	₪1.48B	`f266eba844a0` · scenario

Adjustable reinsurance factors

On `/reinsurer-deck.html` a viewer may move these factors of the plan's own register. The result is the same model under its own hash, labelled a scenario; a value outside the register's range is refused; the saved factors are not written and the film stays sealed to the plan.

Factor	Plan value	Range
Quota-share cession (share of risk GWP) (`cession_rate`)	18%	0% – 90%
Ceding commission (share of ceded premium) (`ceding_commission`)	25%	0% – 50%
Expected claims ratio (share of risk GWP) (`expected_loss_ratio`)	62%	20% – 95%
Carrier own expenses (share of risk GWP) (`insurer_own_expense_ratio`)	5%	0% – 30%

Slides and film script

One 15-second scene per paragraph. A paragraph with no figure is spoken in full; a paragraph that fills a figure is spoken as a short line and its figures stay on the slide. Presenters come from the shared roster and are assigned when a scene is filmed; charts are the plan's own and are shown beside the clip, never drawn by the generator.

Slide 01 — PHINS × Swiss Re Israel

Tuesday 8 December 2026 · Mr. Hillel Damelin, Regional CEO Israel · Israel pilot and the five-year plan

Paragraph 1 · scene `re-s01p01` · 15 s

- On the slide: One regulated contract family — life with a lifelong ADL-3 disability mechanism, long-term care and a savings flow — carried by a licensed Israeli insurer and reinsured by quota share; PHINS is the technology and the administrator.
- Spoken: One regulated contract family — life with a lifelong ADL-3 disability mechanism, long-term care and a savings flow — carried by a licensed Israeli insurer and reinsured by quota share; PHINS is the technology and the administrator.

Paragraph 2 · scene `re-s01p02` · 15 s

- On the slide: A pilot in Israel from 1 January 2027 and a five-year plan to 2031. Every figure in this deck is a default of unified-2026.10-v1 · hash 9128223e1c222388…; nothing is typed by hand.
- Spoken: PHINS × Swiss Re Israel, second point. The figures stay on this slide.

Slide 02 — Why a reinsurer, why now

Paragraph 1 · scene `re-s02p01` **· 15 s**

- On the slide: The pre-ruling track with the Capital Market, Insurance and Savings Authority opened on 12 October 2026; carrier and reinsurance term sheets are the Q4 2026 gate before any sale.
- Spoken: The pre-ruling track with the Capital Market, Insurance and Savings Authority opened on 12 October 2026; carrier and reinsurance term sheets are the Q4 2026 gate before any sale.

Paragraph 2 · scene `re-s02p02` **· 15 s**

- On the slide: Severe disability and long-term care are the protection gap public systems leave open. A quota share on a new, digitally underwritten book is the reinsurer's way into that gap without carrying distribution on its own balance sheet.
- Spoken: Severe disability and long-term care are the protection gap public systems leave open. A quota share on a new, digitally underwritten book is the reinsurer's way into that gap without carrying distribution on its own balance sheet.

Slide 03 — The pilot in Israel — 2027

Chart beside the clip: `in_force`.

Paragraph 1 · scene `re-s03p01` **· 15 s**

- On the slide: Gate 5 — sales begin on 1 January 2027 on the licensed carrier's paper; Gate 6 — the first 1,000 policies in force with an Appointed Actuary review against the kernel; Gate 7 — 24,000 policies in force at year end.
- Spoken: The pilot in Israel — 2027, first point. The figures stay on this slide.

Paragraph 2 · scene `re-s03p02` **· 15 s**

- On the slide: Pilot-year risk GWP ₪54.2M; ceded premium at the plan's 18% quota share ₪9.8M; reinsurer technical result ₪1.3M ($0.3M at planning FX 3.68).
- Spoken: The pilot in Israel — 2027, second point. The figures stay on this slide.

Slide 04 — The contract the reinsurer underwrites

Paragraph 1 · scene `re-s04p01` **· 15 s**

- On the slide: Life ₪1,000,000 with a lifelong disability mechanism — 1:4 below 65, 1:1 from 65 — on an objective ADL-3 trigger; published tables 0.25 / 0.20 per ₪1,000 monthly; ₪4,518 a year at the age-42 specimen.
- Spoken: The contract the reinsurer underwrites, first point. The figures stay on this slide.

Paragraph 2 · scene `re-s04p02` **· 15 s**

- On the slide: One pricing kernel is the single writer for premium decomposition. Repricing runs through it at every gate, and the carrier view is restated on every plan refresh, so the reinsurer reads the same rows as the carrier and the Appointed Actuary.
- Spoken: One pricing kernel is the single writer for premium decomposition. Repricing runs through it at every gate, and the carrier view is restated on every plan refresh, so the reinsurer reads the same rows as the carrier and the Appointed Actuary.

Slide 05 — The ceded line — five years

Chart beside the clip: `ceded_line`.

Paragraph 1 · scene `re-s05p01` **· 15 s**

- On the slide: Ceded premium ₪9.8M → ₪132.0M → ₪336.6M (2027 / 2029 / 2031); five-year ceded premium ₪764.9M ($207.9M).
- Spoken: The ceded line — five years, first point. The figures stay on this slide.

Paragraph 2 · scene `re-s05p02` **· 15 s**

- On the slide: Reinsurer technical result ₪1.3M → ₪17.2M → ₪43.8M; five years ₪99.4M ($27.0M) — 13% of ceded premium at the plan's 62% expected claims and 25% ceding commission; break-even claims ratio 75%.
- Spoken: The ceded line — five years, second point. The figures stay on this slide.

Slide 06 — Quota-share options for the pilot

Chart beside the clip: `carrier_view`.

Paragraph 1 · scene `re-s06p01` **· 15 s**

- On the slide: The plan: 18% cession, 25% ceding commission, carrier margin 5.7%; the reinsurer's five-year technical result ₪99.4M.
- Spoken: Quota-share options for the pilot, first point. The figures stay on this slide.

Paragraph 2 · scene `re-s06p02` **· 15 s**

- On the slide: Scenarios from the same model — at 30% cession the five-year ceded premium is ₪1.27B, the technical result ₪165.7M and the carrier margin 4.1%; at 50% cession ₪2.12B, ₪276.2M and 1.5%. PHINS revenue and EBITDA are unchanged in every scenario; the split between carrier and reinsurer is what moves.
- Spoken: Quota-share options for the pilot, second point. The figures stay on this slide.

Slide 07 — Five-year plan — Israel anchor book

Chart beside the clip: `gwp_split`.

Paragraph 1 · scene `re-s07p01` **· 15 s**

- On the slide: Policies in force 24,000 → 94,080 → 230,554 → 356,110 → 471,621; risk GWP ₪54.2M → ₪1.87B; five-year risk GWP ₪4.25B.
- Spoken: Five-year plan — Israel anchor book, first point. The figures stay on this slide.

Paragraph 2 · scene `re-s07p02` **· 15 s**

- On the slide: The savings flow — ₪660.0M in 2029, ₪1.68B in 2031 — is a separate licensed flow and is never split with the carrier or the reinsurer. The benefit is a lump sum with a fixed sum at risk, not a lifetime care annuity.
- Spoken: Five-year plan — Israel anchor book, second point. The figures stay on this slide.

Slide 08 — Five-year plan — the group

Chart beside the clip: `revenue_ebitda`.

Paragraph 1 · scene `re-s08p01` **· 15 s**

- On the slide: OECD partner markets under local licensed carriers: 1 in 2028, 3 in 2029, 9 by 2031 — 10 markets on one platform, 1,057,350 group lives and ₪3.75B group risk GWP.
- Spoken: Five-year plan — the group, first point. The figures stay on this slide.

Paragraph 2 · scene `re-s08p02` **· 15 s**

- On the slide: A reinsurer that leads Israel can follow the same wording into each market. Group risk GWP × 18% is ₪674.5M in 2031 ($183.3M) — arithmetic on the group GWP row, not a model row.
- Spoken: Five-year plan — the group, second point. The figures stay on this slide.

Slide 09 — What PHINS asks of Swiss Re Israel

Paragraph 1 · scene `re-s09p01` **· 15 s**

- On the slide: Lead quota-share reinsurer for the Israel pilot: a non-binding indication on the plan's 18% / 25% structure by the Q4 2026 gate, and a technical review of the pricing kernel and the published tables under NDA.
- Spoken: What PHINS asks of Swiss Re Israel, first point. The figures stay on this slide.

Paragraph 2 · scene `re-s09p02` **· 15 s**

- On the slide: Beyond capacity, every option stays on the table — lead reinsurer and technical partner for the first partner market in 2028, a data-access arrangement on the evidence pipeline, or an equity conversation kept separate from the treaty. Never a linked price.
- Spoken: Beyond capacity, every option stays on the table — lead reinsurer and technical partner for the first partner market in 2028, a data-access arrangement on the evidence pipeline, or an equity conversation kept separate from the treaty. Never a linked price.

Slide 10 — What Swiss Re sees — governance and data

Paragraph 1 · scene `re-s10p01` **· 15 s**

- On the slide: Agents recommend, humans decide. Every underwriting and claims recommendation is logged with evidence provenance; thresholds move only through an audited promotion step; a contradiction between documents is recorded, never resolved by a bot.
- Spoken: Agents recommend, humans decide. Every underwriting and claims recommendation is logged with evidence provenance; thresholds move only through an audited promotion step; a contradiction between documents is recorded, never resolved by a bot.

Paragraph 2 · scene `re-s10p02` **· 15 s**

- On the slide: One hash-chained ledger, one identity writer, checksummed agent state. The reinsurer's bordereaux read from the same rows the carrier and the Appointed Actuary read.
- Spoken: One hash-chained ledger, one identity writer, checksummed agent state. The reinsurer's bordereaux read from the same rows the carrier and the Appointed Actuary read.

Slide 11 — Capital and timeline

Chart beside the clip: `roadmap`.

Paragraph 1 · scene `re-s11p01` **· 15 s**

- On the slide: Seed ₪6.0M on ₪24M pre-money (₪30M post); Series A ₪18.0M indicative in 2028; group EBITDA positive in 2029. The reinsurer's capacity carries the book; it does not fund PHINS.
- Spoken: Capital and timeline, first point. The figures stay on this slide.

Paragraph 2 · scene `re-s11p02` **· 15 s**

- On the slide: 12 October 2026 pre-ruling · Q4 2026 seed close and term sheets · 1 January 2027 sales begin · Q4 2027 Gate 7 · 2028 first partner market · 2031 10 markets.

- Spoken: Capital and timeline, second point. The figures stay on this slide.

Slide 12 — Next steps after 8 December

Paragraph 1 · scene `re-s12p01` **· 15 s**

- On the slide: Proposed: within two weeks, NDA, data room and a kernel walkthrough with the Appointed Actuary; within six weeks, a non-binding indication on the quota share; before Gate 5, a signed term sheet with the carrier of record named.
- Spoken: Proposed: within two weeks, NDA, data room and a kernel walkthrough with the Appointed Actuary; within six weeks, a non-binding indication on the quota share; before Gate 5, a signed term sheet with the carrier of record named.

Paragraph 2 · scene `re-s12p02` **· 15 s**

- On the slide: Nothing is bound today. No limit, ticket or price is set in this deck; every figure regenerates from unified-2026.10-v1, and the plan is not written by this meeting.
- Spoken: Next steps after 8 December, second point. The figures stay on this slide.

Data integrity

Every PHINS figure in this pack is read from plan identity `unified-2026.10-v1` (content hash `9128223e1c2223881e0eca64ae6922654b79d52bb2eed151beb726f3c4c1589f`). The reinsurer line is an identity on the plan's carrier rows: 2027 ceded premium ₪54.2M × 18% = ₪9.8M; ceded claims ₪6.1M; ceding commission ₪2.4M; technical result ₪1.3M. Technical margin 1 – 62% – 25% = 13%; break-even 1 – 25% = 75%. The group envelope is group risk GWP × cession, arithmetic on a model row and not a model row. The quota-share scenarios are the same model with a different cession and are labelled as scenarios with their own hashes. This pack is generated from the model by `scripts/build_reinsurer_deck_brief.py` and is never hand-edited. It does not write the platform ledger.
