Duration	20 minutes (hard timebox)
Counterparty	Mrs. Orna Carni — Partner, Fintl VC
Location	TBC
Status	Scheduled
Pack	Pitch dashboard — Fintl VC Meetings (5–6 Aug) section

Purpose: first introduction to PHINS — **founder, technology, and regulation** — so Fintl VC leaves with a clear read on who built the platform, what is already in production, and the Israel regulatory pathway.

Elevator pitch — 30 seconds

PHINS is an **AI-operated insurance operating system** — a built production platform for disability / long-term-care severity, with an append-only hash-chained ledger where **AI recommends but never posts**. Founder-led, Israel-first regulatory go-to-market, then OECD markets on the same codebase. We are opening a first conversation with Fintl VC on founder, technology, and regulation.

20-minute run of show — hard timeboxes

Minutes	Segment	Talking points & source
00–03	Opening — PHINS in 90 seconds	AI-operated insurance OS; disability / LTC severity; Israel first. AI recommends, the ledger decides.
03–08	Founder	Who built PHINS, operator credibility (insurance + legal), why this problem, and why now — founder track record and commitment.

Minutes	Segment	Talking points & source
08–14	Technology	Production stack: policy → underwriting → billing → claims → reinsurance on a regulator-grade integrity contract; AI surfaces recommendations with a defensible audit trail.
14–18	Regulation	Capital Market, Insurance & Savings Authority pathway; digital MGA / platform posture (claims reserves stay on the carrier); walk the Israel regulatory application memorandum .
18–20	Wrap-up & next steps	Confirm interest for the 6 August deeper session (technology, regulation, funding, actuary). Log outcome in the Meeting Diary.

Run-of-show rules: hard timeboxes, one speaker per segment, materials pre-shared, questions parked to wrap-up unless blocking. This meeting sets up the 6 August follow-on — do not overrun into funding detail here.
